

Good Night, Better Day

METZELER PRESSURE CARE MATTRESS

We spend more than one third of our life sleeping, moving into up to 60 different positions per night. Therefore it's important you choose a mattress that delivers a quality sleep to ensure you wake up feeling refreshed. Incorporating patented Rubex™ Duo Cell technology, the Metzeler Mattress does just that, giving you the best start to the day.

SCAN ME

Mattress structure and materials provides superior thermoregulation.

Multi-zone system offers optimal postural support and pressure distribution.

CHAIR OPTIONS

- ✓ Optimal temperature management
- ✓ Multi-zone support system
- ✓ Durable reinforced mattress edge
- ✓ Waterproof breathable cover
- ✓ Environmentally friendly materials

Rubex Duo Cell Technology

Rubex Duo Cell combines large and small pores for balanced support and pressure reduction, ensuring optimal temperature control and consistent support from -5°C to +40°C.

Made from eco-friendly materials like sunflower oil, instead of petroleum products.

The tubular mattress design and foam layers ensure superior thermo-regulating ventilation.

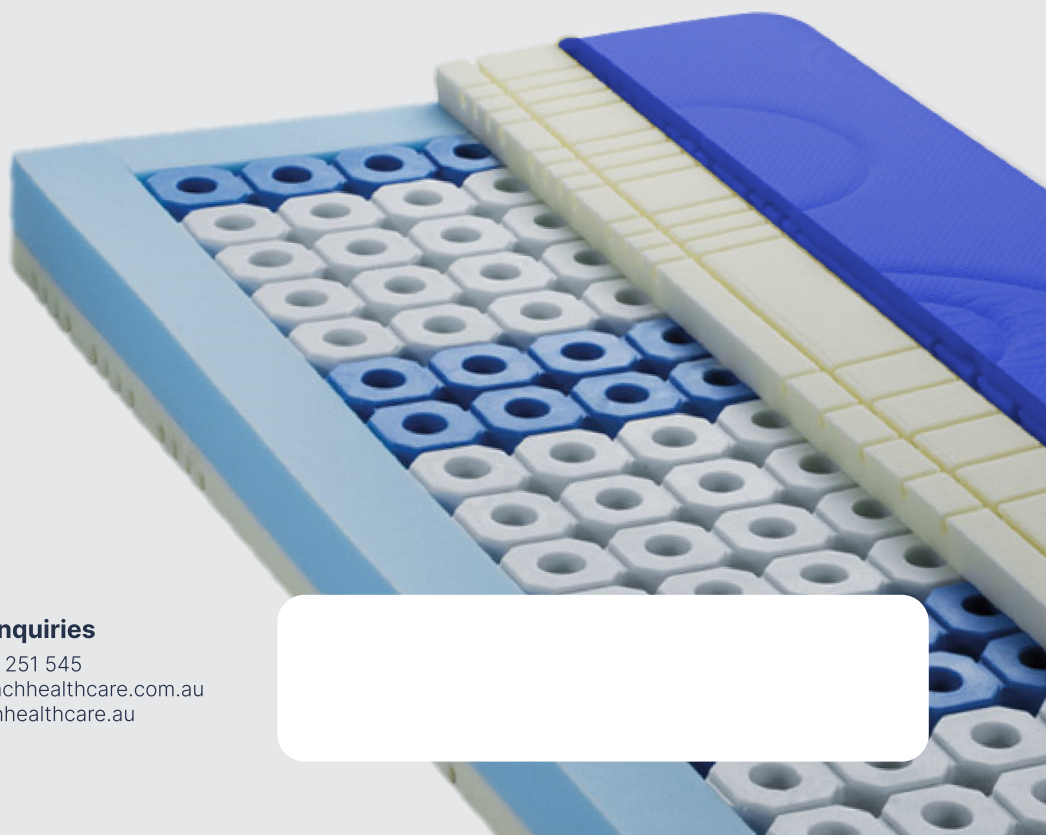

Waterproof, breathable cover that's moisture-managing, easily removable and washable at 95°C.

The mattress's tubular core offers targeted spinal support and even pressure distribution.

Reinforced foam edges aid in safe patient transfer and reduce the risk of rolling off.
