Contour Backrest

The Kinder Contour is designed for children between the ages of 6 & 11 years old. It offers a multi adjustable, manual backrest support, specially designed to stabilise and, where possible, realign spinal asymmetries.

The Contour Backrest can be quickly and easily adjusted in height, depth, angle, rotation and even offset to provide an adaptable mould to support numerous postural or kyphotic challenges. It can be manufactured in a variety of fabrics and colours and can fit to any of our existing Care Chairs.

This versatile chair comes as a manual or electric functioning chair with tilt-in-space, leg rest elevation and back angle recline as standard.

The chair has multi-directional braked castors for full mobility and offers the unique functions of adjustable seat depth, width and height change.

Optional
Chest, Lap, Groin &
Ankle Positioning Straps
